

World Awakening,
[10.09.21 10:48]

Hugh Campbell:

"Humanity accepts changes when the alternative is too painful. This is just a part of the human experience, because we are absorbed in our small corners of the world and experience.

Humanity does not strive for change, but change should move us forward, whether we are ready for it or not. All changes occur at the soul level.

2021 will be the ninth year of a new wave of changes that began in 2012.

The number 9 in numerology is the number of completion, and this will be the first year of a new direction in this new wave of changes. We call this time the New Renaissance.

For the onset of this New Revival, all the foundations that have supported humanity so far must be revealed.

What humanity will discover will be, to put it mildly, instructive.

This system, or more precisely, the belief system, arose out of fear, lack and control. We have spent the last 2020s living in fear and supporting those of us who see fear around every corner instead of connecting with our souls and God himself, who know that we are completely safe and that we can all live in love, peace, harmony and joy.

Our world leaders have played out this contrast for everyone to see so that we can live differently.

The coming changes are beyond the reach of the physical realm, and as we accept the knowledge that we are all creators, not victims, the change will progress. There will be new directions in thinking and leadership.

Some of them will be false starts, but they will quickly disintegrate, as the truth will find its way to the light faster than ever before.

Many of us will feel that we are children in a candy store, and at first we will be disarmed because of how thoughts and desires manifest themselves. This does not mean that we will be free from conflicts.

There will still be some intense conflicts, as this energy of hatred and greed goes out. At such moments, it is important to understand that these souls make statements about the past, so that we all remember where the path of fear, hatred and greed leads.

Discover your Divine Self.

Many of us have forgotten the magic that happens when we live in harmony. When we begin to remember ourselves and God, we become more connected. This harmonious connection is what allows the magic to happen. When we learn to love ourselves, we learn to love others.

When we want the best for ourselves - freedom from greed, and not at the expense of anyone else, we live in the flow of life. When we become abundant, based on love, we show others how to become abundant in love.

There is no shortage of anything in the universe, unless we believe in it. This is the basis of the thought of the New Renaissance. It all starts with what we believe in.

The real revolution in consciousness is within us.

This is the reason why it is so important to devote time to personal growth.

This is not an external journey or movement, and never has been. It's all about becoming connected to the Source and unconditional love from where we came."

"When we find the time to make this inner journey, we connect to the source of Everything that Exists.

Everything is possible here.

Humanity has spent thousands of years trying to achieve change from a human point of view. All changes made with the help of the force have failed and will always fail, because they are completely contrary to the basic energy of the universe, which is unconditional love.

We all came here to learn this, and we will learn it in our own way and in our own time. That's why it's so important to work on yourself and not worry about the paths that others are following, because they have created this personal experience for themselves.

There is nothing wrong with someone else's way; this is just one of many different experiences that lead to spiritual growth. When we learn to appreciate without judging the paths that we have all chosen, we are one step closer to unconditional love.

The year 2021 will be a contrast for compassion and understanding.

Each of the souls shows us the opposite of the flow with the flow of life, which is peace, harmony and joy. This internal recognition and change cannot be legitimized or imposed on anyone; this is a choice that comes from understanding and living from our God. It is also about understanding that what we keep in our thoughts and hearts creates the changes we want.

The year 2021 is a journey in which we will discover our God and learn to live in the unconditionally loving flow of life. If we meditate, calm our minds and communicate with our God, we will grow.

About forecasts.

Those who make predictions feel the discrepancies that occur in the lower course of life. It's like being on a raft and seeing rocks and forks in a stream. Those of us who live in fear swim to the rocks, and those of us who know that we are swimming with all our lives and are safe in all respects, avoid obstacles.

Everything in life is energy manifested in matter and, consequently, in our collective creation. Forecasts are nothing more than maps describing the obstacles visible downstream. When we understand that life is changeable and become more attuned over the course of life, we easily bypass any obstacles.

Intention is important for any prediction, because it is a true gift that can be made to humanity: the knowledge that we are creating our future.

We don't need to understand or dwell on every stone in the stream; we just need to realize that, as beings of light energy, we can flow around them, filling our hearts with love.

We don't have to worry about every obstacle; we just need to understand that we no longer need to live in fear.

We are completely safe.

We intend and declare that we are sailing along with all of life, and we are grateful for this life experience. We are filled with the knowledge that we influence all things, filling our hearts with love and preserving the most favorable results for everyone."
