

So Antifa And Black Live Matter And Alexandria Ocasio-Cortez of New York, Ilhan Omar of Minnesota, Ayanna Pressley of Massachusetts, and Rashida Tlaib of Michigan. With 1,000 Other Democratic Party Members... Said Jesus Is A Trans Woman So What Is A True Woman Is The Question.

According to various sources, Jesus was not a woman, but rather a man who took on the form of a woman through his mother, Mary.

The phrase "born of a woman" means that God came in the flesh and walked on this earth, emphasizing His feminine qualities of gentleness and nurturing. Jesus' self-presentation as a mother hen longing to gather her chicks under her protective wing is an appropriation of God's mothering activity in the Old Testament. While Jesus is fully male, his human composition was supplied by the body of a woman through his mother, Mary. The incarnation says a clear and singular no to misogyny, and God appears to a woman, requests her permission for a divine assignment, deigns to reside within her womb, and uplifts her body as a holy place.

God became a man, and not a woman.

Jesus was a son, not a daughter; a brother, not a sister. He did not labor in childbirth, and until his public ministry began, he worked to provide for his family as a man.

As with his Jewishness, the manhood of Christ is a stubborn, objective fact of history that unsettles modern sentiments, and holds important lessons, challenges, and encouragements for both men and women alike, and especially so in our times of such confusion about sex. So, could Christ have come as woman and not as man?

Without pretending to answer the question exhaustively, one way to approach it is to rehearse how Christ's mission involved accomplishing tasks that God has designed men to do. Consider five aspects of his person and work that demanded a more masculine demeanor than a feminine one.

#### 1. Head of the New Race

God created Adam first, as head of the human race. He did not form Adam and Eve simultaneously (1 Timothy 2:13) — nor did he rush to make Eve as soon as he had finished with Adam, to keep everything as fair as possible, as we might be prone to do it. Rather, God lingered — a profound pause worth considering carefully — and he dealt distinctly with Adam, as head, and then with Eve, as "helper" (Genesis 2:18), both before and after the fall.

In fact, we might even say that God seems to take his sweet time, forming Adam first (Genesis 2:7), then planting a garden (Genesis 2:8), making trees (Genesis 2:9), putting the man in the garden to work it and keep it (Genesis 2:15), and giving the man the moral vision for the garden (Genesis 2:16–17), and thus establishing him as head. Then, still prior to making the woman, God parades "every beast of the field and every bird of the heavens" before the man "to see what he would call them" (Genesis 2:19). Finally, at long last, comes the deep sleep and the taking of the rib (Genesis 2:21–22).

Here, as the apostle Paul observes (1 Timothy 2:13–14), God is making a point. He forms Adam first, gives him the instruction, has him name the animals, and gives him a helper to show us that men and women are not only wonderfully similar and equally valuable as humans, but also gloriously different in countless complementary, mutually beneficial ways, with Adam being head of the first humanity.

So also, Christ came to be head — of a new humanity. “As in Adam all die, so also in Christ shall all be made alive” (1 Corinthians 15:22; Romans 5:12–21). Adam, as head of the human race, “was a type of the one who was to come” (Romans 5:14) — namely, Christ, who came “that he might create in himself one new man” (Ephesians 2:15). As God appointed the man and created the man as head of the first creation, so Christ came as a man to be head of the new race, his church.

## 2. Husband of God’s People

Headship applies not only to one man over the whole of humanity; headship is also God’s design for every marriage. “The husband is the head of the wife even as Christ is the head of the church, his body, and is himself its Savior” (Ephesians 5:23).

Jesus came as a bridegroom to God’s new-covenant people (Mark 2:19). Like a noble husband toward his wife, Christ came to provide for his people, to protect them, and even to sacrifice himself for them. The church does not save Christ. Rather, Christ ventured out into harm’s way and gave himself for us (Galatians 1:4; 2:20; Ephesians 5:2, 25; 1 Timothy 2:6; Titus 2:14) in a way that we do not likewise give ourselves for him. As sinners, we were the damsel in a distress of our own making. He slayed the dragon. Inasmuch as all of us together, as the church, needed Christ’s rescue and provision and protection, so Jesus, as our bridegroom, had to be a man.

## 3. Teacher with Authority

Jesus came not only as head and as husband, but also as an authoritative teacher. His miracles may have dazzled the eyes, but his words changed the world. On the road to Emmaus, his disciples spoke of him being “mighty in deed and word” (Luke 24:19). And the kind of authoritative public teaching, on behalf of God, to which he was called is the kind entrusted to the elders of the church, who are men (1 Timothy 2:12; 3:2).

“He came and preached peace,” Paul says (Ephesians 2:17). As God gave Adam, the man, the moral vision for the garden, to instruct his wife, so God appointed his Son, as Christ, to teach both his disciples (Mark 3:14) and the masses. Jesus issued commands, and he exhorted and charged his listeners in a way that is characteristically fatherly (1 Thessalonians 2:11–12) more so than motherly (1 Thessalonians 2:7).

## 4. Warrior for the Cosmos

Christ also came as a warrior to disarm the principalities and powers (Colossians 2:15). “The reason the Son of God appeared was to destroy the works of the devil” (1 John 3:8). Despite the madness of recent decades — with some women now serving in combat roles — the call to war is a call for men. Men’s bodies and psyches are made by God for combat in a way that women’s, in all their feminine glory, are not.

The ancient prophecy foretold of “enmity between [the serpent] and the woman, and between your offspring and her offspring.” The woman, as mother, would have her vital role to play in the war for the cosmos, but the hand-to-hand combatant with the serpent would be her male offspring: “He shall bruise your head, and you shall bruise his heel” (Genesis 3:15).

#### 5. Rescuer of the Imperiled

Time would fail us to tell of Christ’s coming as the firstborn heir of the Father’s house (Matthew 21:38; Mark 12:7; Luke 20:14) and as the heir of David’s kingly throne (Luke 1:32–33), even as heir of all things (Hebrews 1:2). And so, we finish with one final aspect of Christ’s mission.

We noted Ephesians 5:23 above, but now we emphasize its final four words: “The husband is the head of the wife even as Christ is the head of the church, his body, and is himself its Savior.” We might first associate “Savior” more with warrior, but Ephesians 5:23 makes the connection to husband. Regardless, the overlap shows the masculine essence of all three callings. So also, Christ’s headship over the new humanity implies a rescue mission. But now we focus explicitly on the rescue. Jesus came to call sinners (Matthew 9:13; Mark 2:17), and he came to save sinners (1 Timothy 1:15). He came to give his own body (Hebrews 10:5), his flesh, that he might rescue his body, the church.

Our relationship, as creatures, with our Creator is not egalitarian. Nor is it one in which we are the benefactors and God is the beneficiary. He is not “served by human hands, as though he needed anything, since he himself gives to all mankind life and breath and everything” (Acts 17:25). Indeed, Christ himself, in his own words, did not come to be served, but to serve, and to give his own life as a ransom for many (Mark 10:45). In Christ, God did not come to be provided for by humans. He did not come to be protected by humans. And he did not come at our initiative, but at his. He came to rescue us from the gravest of dangers: human sin and omnipotent divine wrath. And with such a task before him, it was fitting for him to come as a man.

#### Good News for Women and Men

The manhood of Christ is good news for women. It says, in effect, “God made you to be thought for, cared for, provided for, protected, like you long for deep down.” Just as he made us all, in Christ, to be beneficiaries of his attention and love and costly service as the church, so he means for you to be heard and loved and served like that in this passing age. God will care for you like that forever, and one earthly manifestation of his care now, even in this fallen age, is his design for worthy men as fathers and husbands and pastors to care for women in ways that echo Christ’s perfect manhood.

The encouragement for men is not that being the man is easy or full of special privileges. In biblical terms, it is not. It means taking on more, not less — venturing out, taking on risks, exposing yourself to criticism and conflict and peril, to secure and preserve the benefit of those entrusted to your care. The head shoulders a peculiar burden to care for the helper that she does not for her head. The husband gives up personal preference and comforts to greater, collective ends. Teachers pour themselves out in the energy of words. Warriors put their bodies and lives at

risk in battle. So also, a savior who would rescue another must venture into harm's way to bring back the one in peril.

The message of the manhood of Christ is not that manhood comes with perks and extra time on the couch. Manhood, in Christ, is a calling, not a convenience. It is a shouldering of more, not less — not more leisure or momentary comforts. But the encouragement to men is that, through Christ, you can do this. Not perfectly, but genuinely, in ways that really matter. You can put your ear to God's word and get a spiritual and practical vision for your family, and take initiative, and expend energy, with love and gentleness, to bring that vision into reality, as costly as it will be.

Woman marries Jesus Christ, becomes consecrated virgin Jessica Hayes, an Indiana high school teacher, married the love of her life Aug. 15, in a touching, albeit irregular, ceremony. Contrary to what one might expect, Hayes was not marrying a boyfriend.

She was marrying Jesus Christ.

Standing alone in a bridal gown at the altar of the Cathedral of the Immaculate Conception in Fort Wayne, Ind., the 38-year old dropped to the floor. When the ceremony finished, Hayes joined a small, yet deeply devout group of Catholics known as "consecrated virgins."

She became one of just 200 women in the United States and is currently the only consecrated virgin at the Fort Wayne-South Bend Diocese.

"Jessica, like Mary and the many consecrated virgins in the early history of the Church, several of whom are canonized saints, has heard the call of the Lord to live as His spouse," Bishop Kevin Rhoades said in his homily. "The Church confirms this call as authentic. Jessica is making the courageous choice that our Blessed Mother made — the choice of virginity in order to consecrate herself totally to the love of God."

Consecrated virgins occupy a uniquely private role in the Catholic faith. These individuals are not nuns, nor are they supported financially by any diocese. Instead, women who have chosen to become consecrated virgins live their lives traditionally, but dedicate themselves to prayer, penance and service for their faith and church. Consecrated virgins commit themselves to lifelong celibacy, modest dress and apostolic activity. There are only about 3,000 such women on earth.

Hayes notes, in an article she wrote for OSV Newsweekly, she chose to become a consecrated virgin because she wished to continue teaching and serving students as a private individual. Many consecrated virgins become brides of Christ, rather than nuns, because they wish to continue their daily work in addition to dedicating themselves to their faith.

"I longed for one thing I didn't yet have: to give myself in a way I couldn't take back," Hayes wrote. "It seemed that the idea of consecrated virginity lived in the world appeared to me through this discernment of my joys. In a moment of perfect clarity, I felt I was being offered everything that I most wanted."

What Is a Woman? is a 2022 American documentary about gender and transgender issues presented by conservative political commentator Matt Walsh, released by The Daily Wire, and directed by Justin Folk. The documentary features interviews with several medical professionals and even the famous Dr. Phil. Dr Phil The Battle Over Gender Inclusivity in Schools \_ April 20, 2023.

So Antifa And Black Live Matter And Ten Of Thousand Alexandria Ocasio-Cortez of New York, So Ilhan Omar of Minnesota, Ayanna Pressley of Massachusetts, and Rashida Tlaib of Michigan. With 1,000 Other Democratic Party Members... Yes Said Jesus Christ Is A Trans Woman So What Is A True Woman Is The Question. Wow!

The Daily Wire's 'What is a Woman?' documentary touches a nerve It probably seemed like a crazy idea to make a documentary called, "What is a Woman?" but The Daily Wire's Matt Walsh obviously decided to seize on the opportunity, of the absurdity of the question, after would-be Supreme Court Associate Justice Ketanji Jackson Brown was unable to define a woman when asked by Tennessee Senator Marsha Blackburn.

Receiving over 170 million views after being posted by the Daily Wire's Twitter account just last Thursday, its release coincided with the start of the month-long celebration of Pride Month, now held every June. In the end, the documentary became one of the most-watched documentaries ever.

Perhaps, the greatest irony for social media moguls who could have benefited from this massive viewing, is that when the documentary first aired a year ago, Twitter classified it as "hateful conduct" and "misgendering," rendering it unviewable. Elon Musk, who subsequently bought Twitter failed to immediately undo this classification and only after a lengthy and massive amount of pressure was applied that the documentary was finally able to be viewed just a few days ago.

This type of unjustified censorship, which is so prevalent these days, prevented Twitter, for a long time, from basking in one of the greatest accomplishments it has ever achieved since its inception. One can only wonder how former Twitter Trust and Safety Chief Ella Irwin felt, knowing she could have received all the credit for going against the tide and allowing the documentary to be freely viewed when she controlled what content was permitted.

Once Musk finally relented, he encouraged every parent to watch it. In truth, the documentary, made by Matt Walsh, never expressed his own personal opinion. Instead, it recorded the opinions of different individuals who sat down with him and attempted to answer the question that he posed, from their point of view, meaning that it was a collection of varying opinions by many people. So why should that be censored?

Now, the once-scorned project has received unprecedented coverage, as it has trended on mainstream media news stations like NBC, CNN, as well as well-known publications, including National Review and The Daily Beast. In fact, it has gone viral throughout the globe, defying those who sought to silence the answer. Instead, there was fear and reluctance to define the female gender as it has been characterized since the creation of Eve, the first woman.

The 90-minute documentary ended up revealing just how explosive this topic has become – to the point where, just by asking the simple question, some being interviewed became highly offended and refused to continue having their responses filmed.

Since the sudden rise of the transgender movement, the difficulty in defining, “What is a Woman?” stems from the refusal to employ biological identifiers and properties, which were designated at birth, and which are totally biological. Those characteristics limit who can lay claim to that gender, and therein lies the dilemma for those who are now stating that one’s biological markers are not an undeniable factor, in the sex that they prefer, as opposed to the one into which they were born.

If enough people stand by the traditional and infallible proof of gender at the time of birth, then the whole theory of transgenderism falls flat on its face, because it is totally dependent upon how one feels rather than how one came out of the womb. This is the problem with attempting to ignore or override science. Feelings cannot supersede fact no matter how hard you try.

But fact is no longer a determination to those men who suddenly believe that a mistake was made at birth, and that they now aspire to identify as a woman, some going as far as surgically undergoing whatever it takes to make the transition complete.

Such was the case with Dylan Mulvaney, probably the most renowned of all so-called transgenders, after being chosen to appear on Bud Light beer cans. This biological man underwent a litany of surgical procedures to achieve the physical look of a woman. Mulvaney underwent a hairline advancement, brow bone shave, rhinoplasty, cheek enhancement, lip lift, jaw shave, chin reduction and tracheal shave. Those who are unfamiliar with the TikTok star, would be hard-pressed to believe that Mulvaney was ever a man, given the resemblance to Audrey Hepburn.

But while Dylan Mulvaney is already 26 years old, the current push is to get teenagers, and even pre-teens, to join this ever-growing trend by taking puberty blockers before their body has a chance to develop into the undeniable physical attributes which accompany maturity. The move is seen as so controversial that even some members of the gay and transgender community have strongly voiced their disapproval of promoting this type of radical treatment for minors.

Yet, while there is broad support for children to grow into the gender to which they biologically belong, the calculated societal confusion, nonetheless, exists as agenda-driven media. Corporations and financial backers, all of whom have something to gain from this spontaneous trend, have successfully caused ordinary people to hesitate taking a position and unequivocally define the female gender. Because to do so will mean going against the new tide which could earn you the dreaded label of being transphobic.

It's not much different from the way opposition has been cleverly avoided towards any type of lifestyle which, although accepted and celebrated today, not so long ago, was viewed as unacceptable and a departure from natural tendencies.

It turns out that it takes courage to define "What is a Woman?" in the year 2023. And while men can possess many female traits and attributes, just as women can also exhibit many male traits, the two genders were always meant to be different and unattainable by wishing them into existence.

A woman is born with two X chromosomes, is generally able to give birth and possesses an ovary. Body composition differs greatly between men and women both in terms of fat mass, muscle fiber, tissue and overall strength. These are simply irrefutable biological facts which everyone should be able to distinguish, accept and express without fear of being labeled.

Matt Walsh, in his attempt to get a straight answer, may have done everyone a favor by bringing to light the inability to answer the most basic of all questions, but here it is for those who are still not sure: A Woman Is Where You Came From Today Maybe This Is True ?

What if Jesus Had Been a Woman? We know the historical Jesus was a man; I'm not disputing that. But what if he hadn't? Would Christians treat women differently? (I'm thinking about my denomination, which doesn't "officially" ordain female ministers)

What about God?

How are we supposed to assign God a gender when They said humans were created in Their image? If that's true, there are male, female, queer, black, white, indigenous and other traits in God's nature.

I wish there were a Third Testament in the Bible. One that wasn't cemented in a patriarchal society. A new covenant that appreciates and celebrates everyone in the world equally. No majorities or minorities. No privileged or discriminated.

I want a woman to look at God and see that she matters so much because God identifies as a woman. And I want a queer individual to see God and know they matter because God identifies as queer.

I made you look, I know.

Listen, as a white cisgender male, I have lived with the privilege of the entire world seeing God as a male. It's easy to take it for granted, as I have. And most (many?) women have grown to accept it.

But God is beyond gender. We ALL are a reflection of Their glory, made in Their image.

I'm not saying that we force God to look like whatever we prefer. No, I'm saying we are colourful because They are colourful. If I'm green, it is because God is green. If you are red, it is because God is red.

If you are a male, it is because God is a male, too.  
If you are queer, it is because God is queer, too.

If you are a female, it is because God is a female, too.  
We all are made in God's image.

On A Threshold Of A Dream Who I'm I ? Biology True Sex Gender Identity Attraction  
- <https://rumble.com/v2w706k-on-a-threshold-of-a-dream-who-im-i-biology-true-sex-gender-identity-attract.html>

In this true video i hope that my attempts to help all viewers and all sex's to understand without hate for each other the complex biology related to sex, gender identity, and attraction. Biological sex is explained as a symphony of chromosomes, genes, hormones, gonads, and secondary sexual characteristics. Several scientific studies regarding gender identity are examined to help understand underlying biological mechanisms. Lastly, a polygenic inheritance model is used to elucidate the biology of sexual orientation.

This is propaganda. So basically this trans illness is caused from environmental pollution and its disrupting the the basic biology of these people. Also this over use of "rainbow" is nonsense. The color spectrum has nothing to do with this and is not a proper analogy to use. There is nothing to celebrate here, this is sad and shows how the use of these dangerous chemicals in our food, water and products is causing abnormalities. We should not be enabling the mentally ill to continue justifying what is going on. Chromosomes don't lie but well funded scientists do!

I have sexually known many people in my life, there have been some of whom I thought were true, but it fooled me not.

When One "jumps in the sack" with a prospective partner one of the first thing you notice is their genitalia, for me it is very important that it will suit my needs.

Even if their body surgery is at first convincing there is one thing that tells me of what SEX the person I am with.

It is only the body smell "pheromones" that nature uses to guide you to procreate.  
you can't fool the nose!  
Sex is sex, gender is only what you think it is.

The Myth Of Biological Sex Today, the Supreme Court ruled that federal anti-discrimination laws protect gay and transgender employees. The 6-3 majority wrote that LGBTQ employees are protected under Title VII of the Civil Rights Act of 1964, which prohibits discrimination because of sex. The dissenting opinion claimed that Title VII protected only those who were discriminated because they were biologically male or female.

Many who oppose transgender rights believe that gender is determined solely by biological sex. But, biological sex isn't as straightforward as they likely think, and there is no one parameter that makes a person biologically male or female. In fact, many conditions make assigning a biological sex quite difficult.

Despite the complexities, biological sex is often discussed as if it were obvious how to assign male or female sex. In addition to today's Supreme Court ruling, last Friday,

Trump eliminated transgender individuals' civil rights in health care and Roger Severino, the Director of the Office for Civil Rights at the Department of Health and Human Services said of the bill that "We're going back to the plain meaning of those terms [male and female], which is based on biological sex." Earlier this month, Harry Potter author, J.K. Rowling, was labeled anti-trans for making a distinction between biological women and transgender women. And, in April, Idaho became the first state to require that athletes competing in girls' and women's sports be biologically female. None explained exactly how they would assign biological sex in ambiguous cases.

Rowling's comments were in response to an article which referred to, "the menstrual health and hygiene needs of girls, women and all people who menstruate." She tweeted, "'People who menstruate.' I'm sure there used to be a word for those people. Someone help me out. Wumben? Wimpund? Woomud?" After facing criticism for suggesting that transgender women were not women, Rowling followed up, "If sex isn't real, the lived reality of women globally is erased."

The biology of sex is real, but it's extremely complicated, and there is sometimes no easy way to draw a line between the biologically male and female. According to the BBC documentary, *Me, My Sex and I*, "There are about a dozen different conditions that blur the line between male and female. They're known as disorders of sexual development or DSDs.... Altogether, DSDs occur as frequently as twins or red hair."

### Chromosomes

Most think chromosomes hold the key to biological sex, but that's not always the case. Typically, those with two X chromosomes are considered biologically female and those with one X and one Y chromosome are considered biologically male. However, a DSD known as Androgen Insensitivity Syndrome (AIS) leads some to have an X and Y chromosome, but physically appear to be girls. Without genetic testing, babies with AIS are often assigned female sex at birth and are raised as girls. They may not realize they are not biologically female until they hit puberty and don't begin to menstruate.

### Genitalia

The presence or lack of a penis is often thought of as another clear indicator of biological sex, but that's not a decisive way to divide the sexes either. Some individuals are born with ambiguous genitalia and are not clearly male or female in genital appearance at birth. In fact, research indicates that about 2% of the population is born with these ambiguous traits. Those born with congenital adrenal hyperplasia (CAH), for example, are chromosomally female but may have very masculinized genitalia. Despite the ambiguity, biological sex is often assigned to these individuals within a few days of birth.

Clinical psychologist, Tiger Devore, an outspoken advocate for individuals with DSDs who was born with ambiguous genitalia, describes the process that occurs at the birth of a child with ambiguous genitals, "People create radio silence and they wait for the doctors to come up with some kind of decision about this. The doctors are looking at their chromosomes, their gonads, how their tissues respond to various kinds of hormonal influences and seeing what they think will happen if they try to

give this kid a male assignment or female assignment, and that can be a messy process.”

When genitalia is ambiguous, doctors try to determine biological sex by examining many indicators. In addition to chromosomes, doctors will examine if the baby has ovaries or testes, and whether or not they have a womb. Doctors also look at the hormones being produced and try to guess how the baby’s genitals will develop. To complicate the process, the results from each of these tests may not be clearly male or female but could fall somewhere in between. A baby may have a womb and may also have testicles inside their body. Rather than take a “wait and see” approach, doctors often still feel compelled to choose one sex for the baby.

In Devore’s case, in order to conform to society’s norms for how biological males appear, doctors recommended to his parents that he undergo surgery to appear more male. His first surgery was at three months of age. He’s had fifteen more surgeries since then, ten of which were conducted before he turned ten years old.

### Testosterone

In elite athletics, testosterone is sometimes seen as the key to identifying who is permitted to participate as female. South-African runner Caster Semenya was assigned female at birth, raised as a girl and identifies as a woman. But Semenya has a DSD, and as a result, has XY chromosomes and very high testosterone levels. In 2019, new rules were instituted to keep women like Semenya from participating in certain events unless they take medication to lower their testosterone levels. Studies of testosterone levels in elite athletes show overlap between men and women, so it’s tough to use testosterone as criteria for who is biologically male and who is biologically female.

As for the Idaho law which prohibits transgender girls and women from competing in sports Representative Barbara Ehardt, the sponsor of the bill told the New York Times that DNA tests to determine chromosomes would be the first step. “If there are questions beyond that, there are hormone, urine and blood tests that are much more common.” When asked about intersex athletes, Ehardt said, “If there was a situation such as that, that person’s doctor would no doubt already be familiar and already be in a position to solve.” It seems biological sex would once again be left to the subjective decision of a doctor.

One of the reasons most of us are unaware of the ambiguity surrounding biological sex is that genitalia is something we don’t talk about openly. Clinical Psychologist, Aileen Schast, counseled parents who had given birth to children with DSDs and explained in a documentary how difficult it was for parents of a newborn whose sex was not clearly defined. “That early feeling of shame starts to develop. ‘This is something I can’t talk about. It has to do with genitalia, and we don’t talk about that. So, I can’t tell my sister and I can’t tell my friends at work,’” she described. Since few discuss these conditions, many don’t realize that they exist.

“What’s amazed me the most is that there is such a continuum from the male to the female, and it’s really hard to draw a line somewhere neatly in the middle,” Schast added. Biological sex, it turns out, is a lot like gender identity not always male or female, but occasionally somewhere in between. We The People Today!

In this true video i hope that my attempts to help all viewers and all sex's to understand without hate for each other the complex biology related to sex, gender identity, and attraction and we can stop killing each other now and maybe we can live in peace and love as we are and can be on a threshold of a dream starting today !

How Many Genders Are There? Gender Identity List of 170+ Gender Identity Now! The term gender identity was coined by psychiatry professor Robert J. Stoller in 1964 and popularized by psychologist John Money. Gender identity is the personal sense of one's gender. Gender identity can correlate with a person's assigned sex or can differ from it. In most individuals, the biological determinants of sex are congruent and consistent with the individual's gender identity. While a person may express behaviors, attitudes, and appearances consistent with a particular gender role, such expression may not necessarily reflect their gender identity. Essentialists argue that gender identity is determined at birth by biological and genetic factors. In contrast, social constructivists argue that gender identity and how it is expressed is socially constructed instead determined by cultural and social influences. These positions are not mutually exclusive, as an innate gender identity can be expressed differently in different cultures.

#### Main Document

Gender identity is what someone feels is their gender. That means that how someone's private parts or how they look has nothing to do with their gender identity. Different terms, descriptions, and labels exist for other gender identities.

Gender identity can be understood to include how someone describes themselves, how they present, and how they feel. Below are 107 gender identities currently listed for 2023. (These are the more commonly known gender identities - as listed on Wikipedia at [https://en.wikipedia.org/wiki/List\\_of\\_gender\\_identities](https://en.wikipedia.org/wiki/List_of_gender_identities) - and is subject to change at any time.)

<https://www.sexualdiversity.org/edu/1111.php>

#### Glossary of Sexual Diversity and Gender Terms Main Document

Language has power and is constantly changing. The terms listed in this glossary are designed to empower you with language that will help you better understand discussions of gender and sexuality. Many terms are self-identifications; they mean something different to each person who identifies with the term.

The table of definitions listed below is a work in progress and was created to aid both journalists, and others, in learning the correct terminology and meanings to use when writing articles regarding LGBTQ+ topics, as well as making related conversations easier. For the most part, terms are based in Western understandings of gender and sexuality so they may not speak to the experiences of those from many cultures. This is not an exhaustive list but instead provides some basic terminology to support an introduction to related topics.

Remember not to apply labels to individuals. Understand that identities are fluid and contextual - just because someone shares part of their identity with you doesn't mean they're comfortable with you sharing this with others.

<https://www.sexualdiversity.org/edu/901.php>

### Glossary of Sex and Sexuality Words Main Document

Note: Although definitions of sexual terms and references are provided here, it is important to keep in mind that in the area of sex, gender and sexual behavior, the definitions and connotations associated with the words change over time and mean different things to different people. It is also important to separate behavior from sexual and gender identity, to avoid labeling anyone and to respect the terms people use to define themselves.

<https://www.sexualdiversity.org/edu/13.php>

Western culture is committed to the idea that there are only two sexes, male and female. However, there are at least six biological sexes that can result in fairly normal lifespans, and many more than six result in spontaneous abortion as the body knows the fetus won't be viable. Biologists speak of sex being "binary," and there exist only two sexes, which are fundamentally rooted in the binary classification between sperm and ova. Some people are intersex or have a difference of sexual development (DSD). Popular-level publications push this new narrative, with USA Today tweeting that there are "three different types of sexes." Egale, a Canadian LGBT advocacy group, teaches kids in clever rhyme that, when it comes to men and women, "you can be both or a mix of the two, or you can be neither if that's what suits you."

Today, we have genetics and DNA that allows us to examine karyotype. We know, without question, that humans are not just born male and female. There are at least six biological sexes that can result in fairly normal lifespans. (There are actually many more than six but they result in spontaneous abortion as the body knows the fetus won't be viable so it is flushed out of the system in a natural process meant to minimize the amount of nutrients and metabolism devoted to growing non-viable offspring.)

<https://www.joshuakennon.com/the-six-common-biological-sexes-in-humans/>

### The Six Most Common Karyotypes

The six biological karyotype sexes that do not result in death to the fetus are:

X – Roughly 1 in 2,000 to 1 in 5,000 people (Turner's )

XX – Most common form of female

XXY – Roughly 1 in 500 to 1 in 1,000 people (Klinefelter)

XY – Most common form of male

XYY – Roughly 1 out of 1,000 people

XXXY – Roughly 1 in 18,000 to 1 in 50,000 births

When you consider that there are 7,000,000,000 alive on the planet, there are almost assuredly tens of millions of people who are not male or female. Many times, these people are unaware of their true sex. It's interesting to note that everyone assumes that they, personally, are XY or XX. One study in Great Britain showed that 97 out of 100 people who were XYY had no idea. They thought they were a traditional male and had few signs otherwise.

Even today, we irrationally, and rather stupidly, think of someone as a “man” if they look masculine and as a “woman” if they look feminine. It’s entirely arbitrary and can lead to some significant misunderstandings of how the world actually works.

68 Terms That Describe Gender Identity and Expression Gender and sex do not have the same meaning. One is social, and the other is biological. Gender is a spectrum, and there are many terms to describe it. Such language is important for understanding your gender and knowing how to affirm and support others.

<https://www.healthline.com/health/different-genders>

### Biological Sex Is Not the Same As Gender

What causes some confusion in the general public is the use of biological sex and gender as interchangeable terms. They do not refer to the same thing.

Biological Sex – Usually determined by karyotype. The brain, body, and reproductive system can be different sexes, in the case of legitimate transgender people, where the brain physiology resembles that of the opposite sex, or biological chimeras.

Gender – Mostly used for cultural behaviors such as dress, mannerisms, signs of deference, et cetera, that differentiate the sexes, gender itself is not entirely a social construct. As already mentioned, neuroscience research over the past few decades indicates through an overwhelming amount of evidence that gender is not a “blank slate” that is imparted entirely by civilization, but rather has some inherent characteristics that manifest regardless of upbringing or environment.

This is why some fringe activists can seriously say, “You can be a woman with a penis”, while most of the world will look at them like they have lost their mind. They are inherently using the term “woman” to refer to gender and not biological sex. This difference in vocabulary is responsible for virtually all conflicts between groups on issues in this arena. They do not realize they are using a phrase to refer to two separate things that are often, but not always, congruent.

Comparing Athletic Performances: The Best Elite Women in the World to Boys and Men Athletic and Other Athletic Trans-She-He-Them-They-Why-Etc.

This Film From the US Navy Department (1961) shows how to render necessary assistance in the emergency delivery of a baby. Tells how to determine when delivery is too imminent to risk transportation to a hospital and outlines procedures to follow during and immediately after delivery.

How Many Genders Are There XX-XY-XYX-YX-YY And AI-Robots Inclusive Pronouns ?

<https://rumble.com/v2iemq4-how-many-genders-are-there-xx-xy-xyx-yx-yy-and-ai-robots-inclusive-pronouns.html>

So at LGBT Pride Weekend in West Hollywood to ask people some of the most debated questions that are relevant to the community. It got.. crazy. When I presented on issues facing LGBTQ college students at UVM's Mental Health Matters conference this spring, I knew I had my work cut out for me. When the feedback was mixed, I wasn't overly surprised.

Who is Adam's (XY) first wife? Who is Lilith (YY)? Who is Eve (XX) ? Who is God (XYX) ?

<https://rumble.com/v2igace-who-is-adams-xy-first-wife-who-is-lilith-yy-who-is-eve-xx-who-is-god-xyx-.html>

First woman on earth Is Lilith not Eve ? - So In the Jewish\Hebrew mythology it says: that woman Lilith is the first woman on earth created by God before God created Eve, and Adam's first wife, she created by god from the same dust with Adam , Lilith also as known as the goddess of the night & darkness, also related to demon or monster.

Living As Intersex Person Androgynous vs Hermaphroditic Meaning Ask Questions

<https://rumble.com/v2ih6vq-living-as-intersex-person-androgynous-vs-hermaphroditic-meaning-ask-questio.html>

Androgyny and hermaphroditism are terms used to describe mixed biological sex characteristics in humans. Androgyny refers to intersex people born with congenital variations, while hermaphroditism is the possession of both male and female reproductive organs. In psychology, androgyny refers to individuals with strong personality traits associated with both sexes, combining toughness and gentleness, assertiveness and nurturing behavior. Transgender people come from every region of the United States and around the world, from every racial and ethnic background, and from every faith community.

Islamic Transgender Muslims In Pakistan Frequently Asked Questions Transgender People

<https://rumble.com/v2icdks-islamic-transgender-muslims-in-pakistan-frequently-asked-questions-transgen.html>

Sunny is a trans person living in Pakistan. She begs in order to survive. Others get by as sex workers or dancers. Trans people in Pakistan are frequently cast out by their families and live in poverty. They can find safe spaces and a new family in special centers. Here, they do not have to hide and discover that they are not alone in their fight for survival and recognition in Pakistan's conservative society. Only around 10 thousand people of Pakistan's population of 220 million are officially counted as members of the "third gender," yet it's estimated that the true figure may be as high as 300 thousand.

Lesbians Raped Or Forced 2 Sex By Trans Men - Fight Between Trans And Feminists

<https://rumble.com/v2ic25q-lesbians-raped-or-forced-2-sex-by-trans-men-fight-between-trans-and-feminis.html>

Is a lesbian transphobic if she does not want to have sex with trans women? Some lesbians say they are increasingly being pressured and coerced into accepting trans women as partners - then shunned and even threatened for speaking out. Several have spoken to the BBC, along with trans women who are concerned about the issue too. Proposed changes to the Gender Recognition Act have sparked a bitter divide between the trans community and groups of feminists. Sky's Lucy Cotter has been looking at the fierce opposition facing the Government over proposed changes to the Gender Recognition Act. The Transgender community wants to simplify the process of transitioning, including the right to self-identify in a preferred gender - rather than face an extensive assessment.

Doctor Exposes Transgender Propaganda Movement Industry Is Existence Pronouns

<https://rumble.com/v2ibeey-doctor-exposes-transgender-propaganda-movement-industry-is-existence-pronou.html>

Endocrinologist from California explains the devastating effects that puberty blockers, cross-sex hormones, and surgical modifications can have on children's developing bodies. The Transgender Industry Is Culling Tomboys Out Of Existence. Sometimes transgender propaganda is too honest for its own good. For example, Loudoun Now, a weekly newspaper in Virginia's Loudoun County, just ran a horrifying story encouraging gender dysphoria in children.

Trans-Exclusionary Radical Feminists and F.A.R.T. Mass Shooting Hale's Manifesto Info.

<https://rumble.com/v2jufa0-trans-exclusionary-radical-feminists-and-f.a.r.t.-mass-shooting-hales-manif.html>

TERF IS A SLUR and or T.E.R.F. IS A F.A.R.T. ? Documenting the abuse, harassment and misogyny of transgender identity politics. Trans-Exclusionary Radical Feminism " ( or TERF ) it is a minority and radical subgroup of feminism ( let's reiterate it: it is only a part of radical feminism ) characterized by transphobia, especially trans-

myisogyny. These people believe that the only “ real ” women are those born with vagina and XX chromosomes, supporting gender essentialism.

TERF and FART stand for “Trans Exclusionary Radical Feminist” and “Feminism Appropriating Ridiculous Transphobe” respectively. “Gender Critical” is what these people call themselves now that they don’t like TERF anymore (a term that they were using for themselves within the last decade).

TERFs are transphobes loosely organized into a trans hate group. They ally with the conservative religious right to put forth legislation that bars trans people from public and private life. Their current obsession is trans people in sports. While they hate all trans people, they attack trans women especially aggressively as trans women challenge TERFs’ view of biological essentialism around the identity and experience of womanhood. They also have an unhealthy fascination with trans kids and work especially hard to make the lives of trans kids miserable, usually under the guise of protecting cisgender kids.

Welcome to the Guided Tour for Introductory Terms! This list of terms should help give you the basics for understanding much of the Primer and the most common terms you’re likely to run into in the trans+ community. Child Male-To-Female Gender Affirmation And California bill highlighting gender affirmation in child custody cases moves forward. California lawmakers in the State Senate Judiciary Committee on Tuesday moved forward with a measure that would require courts to consider a parent's acceptance of their child's gender identity in custody or visitation cases. U.S.A. New Sharia Law Rules 2022 and Kids Gender Affirming Hormone Therapy Rules 2023 Kids Can Now Start At Age 8 Yrs. Old Puberty Blockers Drugs Per The President Biden's Administration has confirmed that the legal age of consent for oral sex and to marriage will be lowered to age 8 yrs old starting Feb. 14th. 2023

I came from a wonderful family. Fell into prostitution and stripped for 20 years. Drugs alcohol total insanity. Raped, bitten, lit on fire, beat up, guns to my head and knives to my throat and left for dead. It's a life that just gradually happened to me and then it was the norm. I was able to switch off emotions whenever I needed to. I had a madam for years until I went out on my own. Lived that life for 20 years. Thank

God I survived. Now I am a proud woman in recovery and I wouldn't change a thing about my past. I get her totally.

U.S.A. Drug Enforcement Administration & Department of Justice With Help From FBI & CIA & Local Police And Sheriff Dept. All Over U.S.A. Our Killing Thousands America Citizens Right Now Today. No One Is A Missing Person At All. If You Get Pulled Over By Police States In A Car Or Truck With Money You Have A 20% Change You Will Be Killed For The Money Or Sold As A Sex Slave. This Statement Is No Joke At All... You Will Be Killed By U.S.A. Government And Yes This Is Real Information From New World Order Today.

Reports suggest that the government has lost track of 85,000 sex slave and migrant children, and some of them are dead now and many have been forced into sex labor in the U.S. The Biden administration has allowed 250,000 and sold unaccompanied minors to cross the southern border in the last two years, and at least 85,000+ of

these children have gone missing under their watch real numbers are closer to 132,000+ sold by U.S.A. Government. The Biden Pedophile's Administration has been accused of killing and rape children presiding over the abuse of these unaccompanied minors in federal facilities for years, and local communities are left in the dark about the minors' length of stay or their fate once released. Congress is investigating this issue, and hearings are expected to be part of a series of congressional efforts.

U.S.A. Government & Police States Are Seizing Tens Of Billions U.S. Money And Killing Of Thousands People Our Killed Or Missing Or Dead And All The Money Is Gone Now. Highway robbery with badges. That is what Empyreal Logistics, a national armored car company, has been the victim of multiple times within the last year. Five times, drivers with the company have been pulled over for flimsy reasons with officers seizing the cash they were transporting on behalf of customers a total of three times.

Per DOA-DOJ-FBI-CIA-Etc. Every U.S.A. Person Or America Citizens Right Now Today As of Oct 2023 Need To Be In Jail Or Pay \$\$\$ Fines Now. Per federal and local agencies. All The America People Break The Law Ave. 3 Times Everyday with A Ave. Fine of \$512 dollars a day. it add up to 512 x 365 days a year add up to \$186,880 Dollars per year in fines per person right now. also federal and local agencies issue an average of 27 rules for every law over the past decade.

However, the rules issued in a given year are typically not substantively related to the current year's laws, as agency output represents ongoing implementation of earlier legislation. According to a 2020 article, the more than 300,000+ laws and regulatory crimes on the federal law books serve little purpose other than inviting arbitrary enforcement by providing prosecutors the tools to charge nearly anyone with violating some long-forgotten regulation and pay the fines now or go to jail for everyone in the U.S.A..
